

The **eTour** module provides an essential tool to monitor field personnel who are on assigned tours. eTour will ensure check points are reached on time, in the correct order and offer full reporting available of the tour completed.

The eTour module allows you to monitor your business from any eFusion client. It is a multi-site reporting tool that provides you with the audit trail you need to control and monitor the work of your field personnel.

The information is available on any eFusion client providing immediate information about exceptions.

You can define a number of system actions for each tour, so that you are warned about incorrect staff functions and you are able to react immediately when something is wrong. These definitions include:

- Duration of the tour exceeded
- Missed visiting points of the tour
- Remaining points needed for a complete tour

eTour allows you to be notified of system alarms via email. Also based on the activity you can take advantage of a full comprehensive reporting module to effectively analyze the performance of your guards in the field.

Depending on your needs, eTour can help you to track:

- Security guard tours
- Mobile patrols
- Custodial point visits
- Delivery schedules by contractor with credentials

eTour is configurable to your unique requirements.

The key benefits are:

- Saving of time and money;
- Meet compliance requirements;
- Be sure your staff is on site, on time;
- Monitor activity online, from any eFusion client;
- Receive tour reports and out-of-schedule notifications instantly;
- Mitigate potential liability;
- Eliminate clerical errors.

eTour is being used by a number of businesses including:

- **Condominium and Apartment Buildings**
- **Office Buildings**
- **Property Management Firms**
- **Community Associations**
- **Correctional Institutions**
- **Colleges**
- **Manufacturers**
- **Malls**
- **Hospitals**
- **Public buildings**
